Object Oriented Programming
Database Management System

## EXPERIENCE

**NAGARRO** | Associate Engineer
Aug 2022 - Present | GURUGRAM, IN
- TECH: Node.js, Express.js, MongoDB, JAVA
- Single-handedly managed the analysis on the APIs which has helped my team to take a major shift towards the revamp and across teams understood the utilisation of the APIs on the web end which saved their time
- Portal for easy access and managing student data
- Developed REST API using back-end technology and made front-end responsible for sending a self-sufficient request
- Worked on refactoring and optimizing the code structure in the App and also added the missing features like document management, academic records, and many more
- Collaborated with a team to revamp a user interface using React which helped enhance the user experience

**INTIMETEC** | Jr. Software Engineer Trainee
Feb 2022 – May 2012 | JAIPUR, IN
- TECH: Salesforce CRM
- Developed a comprehensive Library Management System from scratch, streamlining book borrowing processes and membership management
- Integrated advanced features to automate notifications, due date reminders, and seamless book availability checks

**SPANDUSK** | Brand Identity & UI/UX Designer
Jan 2020 – Dec 2021 | Kota, IN
- Design, Prototyping, Research, Collaboration
- Designed user-friendly web and mobile interfaces in collaboration with cross-functional teams, ensuring a seamless user experience
- Crafted brand strategies, establishing consistent visual identities with captivating logos, typography, and color palettes across multiple platforms
- Conduct market research and competitor analysis to identify opportunities for differentiation and improvement in brand design

## PROJECTS

**CRYPTO TRACKER**
- Web App to track the live data such as Price, Market cap, etc
- Auto update without refreshing every 30 seconds
- Offers functionality to get data in multiple currencies
  Link: **Crypto-Tracker**

**BLOG POST**
- Built a user-friendly React interface for viewing, creating, and deleting blog posts
- Added like/upvote functionality to boost blog post popularity
- Set up Redux actions and reducers for blog post interactions, including adding, editing, and deleting
